APPLICATION

FACADE SCREW

SELF DRILLING SCREW PARTICULARLY FOR FASTENING OF TRAPEZOIDAL PLATES OR SIMILAR TO WOOD

- Drilling, tapping and fastening in one operation
- Hardened steel screw with reduced drill point #1
- Supplied with Ø14 mm alu washer vulcanized with EPDM for better load distribution and increased sealing abilities
- If slightly tilted angle of fastening the sealing is still the same
- High thread at the head for better grip in the sheet. Protects the sheet – no deformation
- Surface treated with ZYTEC™+
- Available in 500 colours (QUALICOAT certified powder)

ROOF INSULATION SCREWS

SELF DRILLING SCREWS FOR FASTENING OF INSULATION ON ROOF TO STEEL OR WOOD

- Good corrosion resistance - resistant to 15 Kesternich cycles according to ISO 6988 / DIN 50018
- NBI / SINTEF: Approval nr. 2439
- #1 drill point for increased pull-out values
- Designed to fit with telescope fixing (MG/PG 06 8090 - TSH)
- It is an advantage that the telescope fixing should be as long as possible however, it is important that the insulation thickness is minimum 20 mm thicker than the telescope fixing. The total length of the screw and telescope fixing should be 50 mm longer than the insulation thickness

TELESCOPE FIXING

TSH

- Telescope fixing for fastening of insulation on rood
- The telescope fixing is equipped with 4 cutting wings along the shaft to improve penetration in the roofing cardboard and insulation
- Material: Modified shock absorbant polypropylene

SANDWICH PANEL SCREW

SELF DRILLING SCREW FOR FASTENING OF SANDWICH PANELS TO WOOD AND STEEL

- Drilling, tapping and fastening in one operation
- Hardened steel screw with reduced drill point #1
- High thread at the head with "free spin" for better grip in the sheet. Protects the sheet – no deformation
- Supplied with Ø19 mm alu washer vulcanized with EPDM for better load distribution and increased sealing abilities
- Surface treated with ZYTEC™ M
- Available in 500 colours (QUALICOAT certified powder)

APPLICATION

- The screw drill through the sandwich panel and then the wood / steel substrate
- The high thread at the head locks the sheet to prevent deformation
- The cone below the head ensure maximum sealling between the screw head, washer and sandwich panel.
- Free-spin function of the thread just below the head avoiding the spinning thread from locking through the hole in the outer panel sheet, - and thereby maintaining the assembly and pressure between sheet and washer

SANDWICH PANEL SCREW

SELF DRILLING SCREW FOR FASTENING OF SANDWICH PANELS TO STEEL

- Drilling, tapping and fastening in one operation
- Hardened steel screw with drill point #2+
- High thread at the head with "free spin" for better grip in the sheet. Protects the sheet – no deformation
- Supplied with Ø19 mm alu washer vulcanized with EPDM for better load distribution and increased sealing abilities
- Surface treated with ZYTEC™ M for optimal corrosion protection

- High thread at the head with "free spin" for better grip in the sheet. Protects the sheet – no deformation
- Supplied with Ø19 mm alu washer vulcanized with EPDM for better load distribution and increased sealing abilities
- Universal solution, can be used in many different materials
- (concrete, lightweight concrete and brick walls/masonry etc.)
- Pre-drilling by Ø6.0 mm in bricks and Ø6.5 mm in concrete
- Timesaving installation - fastens without plugs
- Surface treated with ZYTEC™ M for optimal corrosion protection
- Available in 500 colours (QUALICOAT certified powder)
